[github.com/wagnerparnoff/](https://github.com/wagnerparnoff/) [Porto Alegre, RS](#) [BR](#)

I am a developer with some years of experience in front-end and back-end development and infrastructure. I worked on some applications with high traffic (millions of daily visits). I have solid knowledge in functional programming, OOP, and learning DevOps, Javascript. I am interested in learning more about front-end applications and scalability, infrastructure, best development practices.

## PROFESSIONAL EXPERIENCE

May 2024 Actual	<b>Full Stack Developer, ,</b> <b>Company : Quality Digital</b> <ul style="list-style-type: none"><li>› VTEX IO : I worked on developing customized e-commerce solutions using VTEX IO, where I was responsible for creating and maintaining front-end components with React, integrating with APIs, and configuring customized themes. I also have expertise in performance optimization and implementing SEO practices to ensure an efficient and user-friendly shopping experience.</li><li>› Fast Store : I worked with the modular and scalable structure of Fast Store, developing and configuring stores focused on high performance and user experience. I led projects involving the creation of customized pages, the implementation of new features, and continuous improvements in the store's design and usability.</li></ul> <p><a href="#">GraphQL</a> <a href="#">NodeJS</a> <a href="#">TypeScript</a> <a href="#">React</a> <a href="#">Jira</a></p>
October 2019 May 2024	<b>Full-Stack developer, ,</b> <b>Company : Grupo Zaffari e Bourbon</b> <ul style="list-style-type: none"><li>› Experience developing an e-commerce application with React, Node.js, and GraphQL on VTEX.IO.</li><li>› Development of internal applications using VueJS.</li><li>› Implementation and maintenance of CI/CD pipelines with GitLab, integrating GIT version control and automating deployment processes.</li><li>› Development and support of Docker environments, focusing on container automation for consistency and scalability.</li><li>› Monitoring applications using tools like Grafana and Prometheus integrated with GitLab CI.</li><li>› Automation of repetitive tasks using scripts in GitLab CI to optimize workflows.</li><li>› Deployment and maintenance of PHP and JS applications in Dockerized environments, facilitating continuous integration and delivery (CI/CD).</li><li>› Managing staging and production environments through GitLab pipelines.</li><li>› Supporting and maintaining WordPress applications and Microsoft tools with a focus on stability and performance.</li><li>› Resolving conflicts and merges in collaborative development environments using Azure and GitLab.</li><li>› Managing artifacts and releases using GitLab for version control. Configuration of runners in GitLab CI for automated job and test execution. Automated deployment of applications with Docker integrated into GitLab CI. Creation and management of SharePoint pages, lists, and forms, utilizing automation to enhance efficiency.</li><li>› Collaboration with development teams on e-commerce projects using React, Node.js, and</li><li>› GraphQL on VTEX.IO, implementing DevOps practices for continuous value delivery.</li><li>› Automated security and code quality analysis through tools integrated into the GitLab pipeline.</li></ul> <p><a href="#">VueJS</a> <a href="#">Docker</a> <a href="#">GitLab</a> <a href="#">Postgres</a> <a href="#">React</a> <a href="#">VTEXIO</a> <a href="#">Linux</a></p>
September 2017 September 2018	<b>Intern, QA, Developer</b> <b>Company : ADP - Automatic Data Processing</b> <ul style="list-style-type: none"><li>› Experience as a developer with data integration.</li><li>› ETL Developer</li><li>› Data Warehouse Modeling and Integration</li><li>› Automatically migrate new customer databases to the ADP eXpert payroll solution.</li><li>› Development of ETL routines to generate reports of indicators of the integrity of the payroll system database used by the client, in order to collect the missing information and ensure the quality of the conversion</li><li>› Working in an agile development team with Scrum methodology.</li></ul> <p><a href="#">SQL</a> <a href="#">ETL</a> <a href="#">QA</a> <a href="#">Business Intelligence</a> <a href="#">Agile</a> <a href="#">Scrum</a> <a href="#">Data Integration</a></p>

June 2015	Intern - (P&D), DEVELOPER, Researcher
June 2017	<b>Company :</b> LAD - Laboratório de Alto Desempenho - PUCRS/DELL <ul style="list-style-type: none"> <li>➢ Development of virtualized platform for automation and execution of automated tests</li> <li>➢ Construction of the tool for testing applications developed on android</li> <li>➢ Development using platforms like OpenStack</li> <li>➢ Orchestration of virtualized machines and cloud servers</li> <li>➢ vmware/hyper-v software</li> </ul>
	<a href="#">Linux</a> <a href="#">Apache</a> <a href="#">Virtualization</a> <a href="#">VMware</a> <a href="#">Openstack</a> <a href="#">Python</a> <a href="#">PyCharm</a>

## SKILLS

---

<b>Programming</b>	NodeJS, Javascript
<b>Frameworks</b>	VueJS, React
<b>Database</b>	Postgres, MySQL, MongoDB
<b>Development Tools</b>	VS Code, Git, GitLab, Postman
<b>Middleware</b>	Apache Tomcat
<b>Operating Systems</b>	Windows Server, Linux Redhat/Centos
